Scheduled Deployments have been implemented to pick the manifest placed at the Build output path and automatically deploy it.

The Scheduled Deployments has been implemented for STG environment for the following components

Components	Scheduled Workflow name	Manifest type to be dropped @ Build output folder
Grocery	Scheduled - Component Grocery Deployment	Master
Appstore	Scheduled - Component AppStore Service Deployment	Master
Login	Scheduled - Component Login Website Deployment	Component
LoginUIAssets	Scheduled - Component LoginUIAssets Deployment	Component
UIAssets	Scheduled - Component UIAssets Deployment	Component
BackOffice	Scheduled - Component Backoffice Website Deployment	Component

How it works?

The Nolio Work flows has been scheduled at regular intervals of 8 hrs.

That is the deployment will happen at the following times:-

1. 8:00 A:M IST
2. 4:00 P:M IST
3. 12:00 A:M IST

==In case of any changes are required please let Jaguars know.==

The Workflow will get the Manifest from the build output location" \\Uktee01-clusdb\IGHSBuildOutput\IGHS_Manifest\ScheduldedDeployment\STG\<ComponentName>" and compare it against the manifest in Archive folder. If both the manifests are same it skips the deployment else it continues to deploy.

Please find the below path where the Manifests has to be dropped

Component	Manifest to be dropped @ location
Login	\\uktee01-clusdb\IGHSBuildOutput\IGHS_Manifest\ScheduldedDeployment\STG\Login
LoginUIAssets	\\uktee01-clusdb\IGHSBuildOutput\IGHS_Manifest\ScheduldedDeployment\STG\LoginUIAssets

Grocery	\\uktee01-clusdb\IGHSBuildOutput\IGHS_Manifest\ScheduldedDeployment\STG\Grocery
UIAssets	\\uktee01-clusdb\IGHSBuildOutput\IGHS_Manifest\ScheduldedDeployment\STG\UIAssets
Appstore	\\uktee01-clusdb\IGHSBuildOutput\IGHS_Manifest\ScheduldedDeployment\STG\AppStore
BOA	\\uktee01-clusdb\IGHSBuildOutput\IGHS_Manifest\ScheduldedDeployment\STG\BOA

Nolio would trigger an email post successful deployment.
